WORLD'S BEST CAT LITTER™ ANNOUNCES FALL 2009 LAUNCH OF NEW LOGO, PACKAGING, PRODUCT NAMES AND WEB SITE

The New Look Reinforces the Litter's High-Performance Odor Control, Clumping and Natural Attributes

MUSCATINE, IA – June 15, 2009 – WORLD'S BEST CAT LITTER™ – the whole-kernel corn litter known for its high performance, odor control, compact clumping and all-natural attributes – announces the "Fall 2009 Launch" of its new logo, packaging, web site, product line names, advertising and communications campaigns. The new, graphically-bold package features striking, cat face designs and states: "100% Natural, 110% Performance.™" Formerly called "Original Formula" and "Extra Strength Multiple Cat Formula," the litters will soon be available as newly named "Clumping Formula" and "Multiple Cat Clumping Formula." (The actual formulas for this all-natural cat litter remain the same, using the patented, scientifically proven process and naturally microporous whole-kernel corn and all-natural ingredients for which the litter is known; only the names are changing.) With the combination of an advanced scientific process and all natural ingredients, WORLD'S BEST CAT LITTER™ provides advanced odor control and easy clean-up through instant clumping, without the use of chemicals or perfumes. WORLD'S BEST CAT LITTER™ is available at pet specialty stores (PetSmart and PETCO), independent pet stores and select grocery stores nationwide. [For information about WORLD'S BEST CAT LITTER™, please go to: www.worldsbestcatlitter.com.]

The High-Performing, Safe Cat Litter: Odor Control, Clumping, All Natural & More WORLD'S BEST CAT LITTER™ is a natural "scoopable," long-lasting litter that provides easy litter box maintenance and clean-up for those seeking powerful odor control and instant clumping, as well as a safe, eco-friendly choice for their pets, families and homes. Also, for those with allergies or sensitivities, the whole-kernel corn and plant ingredients in WORLD'S BEST CAT LITTER™ have no synthetic chemicals, clays, silica dust or perfumes.

"We have worked hard to deliver the triple-win for cat owners to like their litter, love their cat and respect the planet," says Director of Sales and Marketing, GPC Pet Products, Paul Zobel. "In conducting user research with WORLD'S BEST CAT LITTER™ with a third-party research group and in our labs, we tested the competition and have concluded there is no other product on the market that controls odor and clumps as well as WORLD'S BEST CAT LITTER™. Therefore, in this confusing market, we want to make sure our packaging and brand strongly reflect our litters' high performance and unsurpassed odor control that today's cat owners demand."

Product Features and Benefits

WORLD'S BEST CAT LITTER™ is a "scoopable," long-lasting litter that provides easy litter box maintenance and cleanup for those seeking powerful odor control, as well as a safe, eco-friendly choice for their pets, families and homes.

The new packaging showcases the following benefits:

- **Ends odor the best.** WORLD'S BEST CAT LITTER™ is the only litter made from whole-kernel corn. That means it has a naturally microporous structure that traps ammonia odor in every clump.
- **Clumps the quickest.** The naturally absorbent whole-kernel corn in WORLD'S BEST CAT LITTER™ clumps moisture on contact with no seeping, sinking to the bottom or sticking to the sides of the box.
- **Scoops the easiest.** Because it clumps fast and forms compact clumps, WORLD'S BEST CAT LITTER™ is easier to scoop. So cleanup is easy and convenient.

-more-

- **Lasts the longest.** Clumping on contact keeps the rest of the litter dry. Testing shows that, as a result, one bag of WORLD'S BEST CAT LITTER™ can last up to two or three times longer than other clumping litters, saving time and money.
- **Pet and people safe.** Because WORLD'S BEST CAT LITTER™ is made from all-natural ingredients with no added chemicals it's safe for cats and cat owners alike—even those with allergies or sensitivities. There are no toxins in case it is ingested. And unlike clay litters, there's no silica dust for humans or cats to breathe.
- **Planet friendly.** WORLD'S BEST CAT LITTER™ isn't mined, drilled, or artificially produced. It's milled from renewable whole-kernel corn and is 100% biodegradable. And because it disperses in water, it's also septic-safe and flushable.*
